

MAGIQTOUCH® (⚡)

WIRELESS Next Generation Smart Controller

Specifically designed
for replacement installations

Uses wireless gateway technology

No need for access to wall cavities

No need for wiring

Use up to 11 controllers

Available with:

MagIQtouch Wireless Zone Controllers

Mini controllers manage each zone

Built-in air sensors measure temperature
and conditions in each zone

Adjusts unit to maintain ideal temperature

Use up to 9 zone controllers

2 x Main Controllers

Up to 9 x Mini Wireless
Zone Controllers

COMING IN 2017

Features and benefits

Smart, sophisticated and incredibly intuitive, your MagIQtouch controller makes operating your heating and cooling so simple. Its discreet and modern design will blend seamlessly into the décor of your home. Now with flexible installation options, there is a MagIQtouch solution for every situation.

General Features:

Program mode

Settable 7 day, 4 time periods program, customisable to suit your lifestyle (including a temporary over-ride function).

Service alert

Informs you when your unit needs to be serviced[^].

Child access lock

Select a pin code to control access to your Controller.

Date and time

Date and time displays appear on all operation screens.

Screen brightness

Adjust the brightness of the screen when in standby mode, to suit your home and preference.

About appliance

Displays information about your appliance including serial number, model number, and software version.

Status information

When this option is turned on, a temporary information display window becomes accessible on all Manual and Program screens to aid in troubleshooting.

Inbuilt diagnostics

If a fault is detected in the system, a fault message dialogue box will appear with information about the fault and options available to resolve the issue.

Heating Features:

Zone your home

Switch between zones in your home and control the heating settings in each zone. Save on running costs by switching zones off[#].

Cooling Features:

External air sensor

Displays current outside temperature. Intuitively optimises water and energy usage based on outside ambient conditions. Extends the life of your air conditioner by automatically draining the water tank when temperature nears freezing.

Humidity control

When a "master" air sensor is used, not only can it measure temperature but it can control humidity conditions too.

Auto clean function

World's first fully automated pad cleansing capability enables you to set and forget ensuring your cooling pads remain clean, fresh and functional all summer long, season after season.*

Auto drain and dry**

This optional function allows you to set a schedule to automatically drain water from the tank and run the fan for an extra hour to blow the pads dry, this enhances the prevention of algae growth and prolongs the life of your Chillcel pads.

Manual drain**

This function turns the cooler off at the press of a button and drains the tank filling with fresh water.

Pad flush

Ideal for bushfire prone areas. Pad flush turns the cooler off and runs the pump continuously, or for a set time.

Energy saving quiet mode

When turned on, the energy saving "quiet" mode automatically reduces fan speed for even greater economy and whisper-quietness. This feature might be used during the night time for example.

Auto restart

Option to automatically restart your cooler after a power outage.

[^]Breezair models only +Only available on Breezair EXS models available exclusively through your Climate Masters of Seeley International dealer. *Only for cooler models fitted with the water management system. Ask your dealer for further information. **Optional on the EXQ series and is only available with the Harmony MagIQtouch Controller. #Zoning is an optional extra.
